Plant a seed in the ground, let its roots go down down down down  
Plant a seed in the ground, let its roots go down!

Soon the stem will start to show, and the leaves will grow and grow and  
Soon the stem will start to show and the leaves will grow!

Then where nothing used to be, there will be a little tree  
Then where nothing used to be, there will be a tree!

## **FOR NO PARTICULAR REASON**

Sun rise up in the morning, Sun rise welcome the day  
Sun rise greet me with laughter, Sun say, "Come out and play!"

Clouds all gossip together, get all the news from the birds  
Wind is learning the tune in case sky has forgotten the words!

Moonlight shines in the darkness, full moon glows in the night  
Moon asks, "Will you dance with me? We'll leave sparks of moonlight!"

(whisper) Stars sing softly together, still lake echoes the song  
Dark trees whisper "I love you", and the shadows all sing along!

## **UPPAS**

Take my hand and come with me, there's something I want you to see ...
